- ☐ any table(s) related to sequence listing (*specify*): _____

* If item 4 applies, some or all of those sheets may be marked "superseded."

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	4	YES
	Claims	1-3	NO
Inventive step (IS)	Claims		YES
	Claims	1-4	NO
Industrial applicability (IA)	Claims	1-4	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

Document 1: JP, 53-36004, A

Document 2: JP, 53-36005, A

(1) Claims 1-3

The "hydraulic pressure source," "hydraulic pump motor," "inertia body" and "open/close valve" described in claim 1 are described in document 1 (see the description concerning Fig. 2) cited in the ISR as "first pump 3," "second pump 7," "flywheel 8" and "second solenoid valve 12." Furthermore, they are also described in document 2 (see the description concerning Fig. 2) cited in the ISR as "first pump 2," "second pump 6 and third pump 17," "flywheel 15" and "solenoid valves 10 and 19." Moreover, the matters described in claims 2 and 3 are considered to be obvious from the descriptions of documents 1 and 2. So, the subject matters of claims 1-3 do not appear to be novel or to involve an inventive step.

(2) Claim 4

For the apparatuses described in documents 1 and 2, only examples in which one "load" is driven are described. However, unless there is any other special matter, it is considered to be a mere matter of design variation that a person skilled in the art could have employed as required, that constitutions, each of which is provided for one load, are provided in parallel to each other. So, the subject matter of claim 4 does not appear to involve an inventive step.
